

Accomplished

I am goal driven and like to get stuff accomplished. I'm not one much for whining and complaining. I want to know what I can do to help you and then I work with a positive attitude to get it done. I am a practical problem solver; working step by step to bring a project to completion. A good public educational system is essential for the improvement of society and democracy and for the economic health of our city. I will work hard to accomplish what needs to be done for our 50,000+ students, for their parents and for our community.
