

Experienced

Leading a large, urban school District is a unique challenge. I have 27.5 years of experience in doing just that. I began my career with Wichita Public Schools Facilities Division in an entry level position and after five promotions; I ended my career as the Director of the Division. I have improved every District Facility, I have advocated for our District students and staff, I understand the inner workings of the District. I know all our current Board Members, and I have provided training to many of our principals and staff. I have experience with setting goals, solving problems, preparing budgets, completing projects and all the time with high expectations and focused on the mission of student achievement!
